BookSpaHotel.com | Prague, Czech Republic

- Fixing daily issues and bugs
- Cropping and syncing all of images to CDN with multiple sizes
- Making more flexible admin interface for managers
- Sending new clients and reservations to CRM system

Vue Developer (Full-time)

January 2019 - April 2019

One Easy Solution LLC

One Easy Solution - is a software development company dedicated to automate restaurant and catering industries' daily routines and make business management easy.

My task was to make a food delivery website with Vue.js with REST API and integrate Stripe Payment System for online ordering.

CO-Founder

May 2017 - Present

Avtotemir.az

Avtotemir.az is a website that connects car masters. Any visitor can easily find a suitable master for himself.

Store owners can manage their page and add auto parts for selling. Site has an advanced search system to find any parts for any vehicles.

Release date: 28 May, 2017

- Backend Development with PHP Laravel Framework and Mysql 5.7
- Building up Ubuntu Server (Linux CLI)
- Flexible admin panel
- Optimization for Google SEO

Senior Software Developer (Freelance)

August 2018 - January 2019

Marcom.az | Baku, Azerbaijan

Marcom is a creative marketing and communication company that provides digital services. My main task was to make e-commerce websites.

Some interesting Projects:

• Agrobazar.com

It is an agriculture platform that allows users to put theirs items for selling.

My tasks:

- Building flexible search
- Deactivating old ads by daily
- Keeping media files in CDN Storage
- Integrating Bank Payment Systems
- Integrating Operator payment Systems (by sms)
- Building REST Api to send data to another services
- Automatically sending emails to the clients about statuses of ads (ad accepted, declined or deactivated)
- Flexible and functional admin panel for managers

• Evimizstore.az

My tasks:

- Syncing Store Cashbox with Web Server
- Integrating Bank Payment Systems
- Building REST Api to send and receive data from another services

Backend Web Developer (Full-time)

April 2017 - June 2018

"APAHolding" Company | Baku, Azerbaijan

As a team member:

- Pogramming: (PHP (including Laravel Framework), Mysql, Git, Redis, Javascript (Jquery, Socket.io))
- Building up a web server using CLI: (Ubuntu, Debian)
- Support launched projects

Highlighted Projects:

- Psg Investment Company
